

The evolution of an ergonomic revolution

Aeron

Designed by Bill Stumpf and Don Chadwick, 1994 Remastered by Don Chadwick, 2016

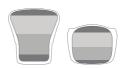

When designers Bill Stumpf and Don Chadwick set out to create a chair that was health-positive, cross-performing, inclusively sized, and environmentally sensitive, they arrived at a design unlike the world had ever seen. Aeron demonstrated a pioneering step in ergonomics and material innovation, and provided a comfortable solution without the standard use of foam, fabric, or leather. It changed people's perception of what an office chair could be — and in doing so it soon found a place in popular culture.

Fast forward to the present, and the same criteria serve as the foundation for a whole new Aeron. While its iconic form has remained largely unchanged, the Aeron Chair has been remastered from the casters up to meet the needs of today's work and workers. With the help of original co-designer, Don Chadwick, we thoughtfully updated the chair based on the latest research around the science of sitting, and advancements in materials, manufacturing, and technology.

Performance

At Herman Miller, we have learned a great deal about how best to support people in the varied postures they adopt throughout the workday. With the new Aeron Chair, we incorporated two decades' worth of technological and ergonomic enhancements to improve the health-positive design, and widen the range of cross-performance capabilities. With updates that include a more refined tilt mechanism, adjustable PostureFit SL™, and 8Z Pellicle® suspension, the new Aeron performs better than ever before − so you can too. Stools take the remastered Aeron chair to new heights, pairing well with higher work surfaces, tables, and countertops.

Zonal Support
New 8Z Pellicle offers unprecedented
comfort through eight varied zones of
tension in the seat and back. To better
envelope the sitter, the tightest zones keep
the body off the frame and in the chair, while
more compliant zones conform to the sitting
bones and distribute weight evenly.

Natural Movement

An updated tilt mechanism delivers a smoother trajectory and optimal balance point to keep people in control of their movement throughout the entire range of recline.

Design

Just as iconic films and albums are updated for new mediums, standards, and audiences, Aeron has been remastered to meet the needs of today's work, workers, and work environments. By coupling co-designer Don Chadwick's vision with Herman Miller's latest research around the science of sitting, the new Aeron works smarter than ever before.

About Bill Stumpf and Don Chadwick

Between Bill Stumpf's flair for function and Don Chadwick's eye for elegance, the two possessed all of the right components to create revolutionary, identifiable performance chairs. They started with the Equa® Chair designed for Herman Miller in the 1980s. In the 1990s, Stumpf's deep understanding of ergonomics, Chadwick's rich feel for aesthetics, and Herman Miller's rigorous research and engineering power delivered the Aeron Chair — a seat that became synonymous with comfort and recognised for its dematerialised design. Using his and Stumpf's initial criteria for the Aeron Chair, Chadwick is the sole designer to work with Herman Miller on the new Aeron.

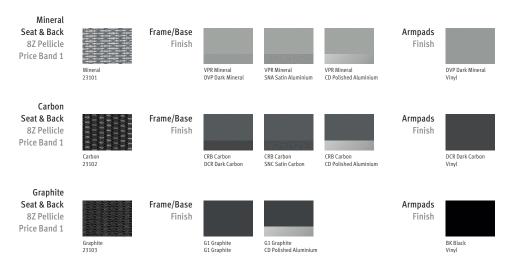

Bill Stumpf and Don Chadwick

Materials

Through hundreds of samples, tests, and iterations, we arrived at three tightly curated, holistic material expressions. Graphite is the darkest, a modern rendition of the original Aeron. Carbon offers a balanced neutral that works equally well in warm and cool environments. Mineral is the lightest, ideal for today's more open office environments.

Created through a unique painting process, Aeron's satin aluminium finish offers a lustre redolent of high-end electronic equipment. Colours were developed to harmonise with the chair's other components. Details such as these contribute to a product worthy of the Aeron name, but they are not enough. Each detail contributes to a seamless whole.

Aeron Chair

Family Work Chair The following information applies only to Aeron work chairs. Overview Maximum User Weight Size A 300 lb/136 kg

Maximum User Weight Sizes B and C 350 lb/159 kg Population Range 1st-99th Percentile

Back Support No Additional Support Optional Standard Adjustable Lumbar Support Optional Adjustable PostureFit SL Support

Seat Height

Low: 375mm-483mm Standard: 406mm-518mm High: 406mm-541mm High: 406mm-541mm3

*range may vary depending on cylinder height

Seat Depth Size A

400mm Size B 432mm 470mm

Tilt Options Standard Tilt Tilt Limiter Tilt Limiter with Seat Angle

Arm Options No Arms Fixed Arms Height-Adjustable Arms Height-Adjustable Arms and Pivot Fully Adjustable Arms

Environmental Highlights Recyclability Up to 91% BIFMA level GREENGUARD Gold Cradle to Cradle Certified Global GreenTag Green Rate Level A
