

Atlas Office Landscape

**Designed with people in mind,
for space planning that's both
intelligent and imaginative**

To do their best work, people need workplaces that foster innovation. Many offices, however, still look and feel as though they were designed for another era. At Herman Miller we consider workplace design holistically, and create spaces where the surroundings, furnishings and tools work in concert, creating an environment where people are healthy, productive and engaged.

Designers
Tim Wallace
