Setu®

Instant comfort
for anyone, anywhere

Setu
Designed by Studio 7.5

The function and contours of Setu were shaped by the world around us. The designers of Studio 7.5 observed the ways technology has changed how we work, where we work, and how we move throughout the day. We're working more collaboratively, in a variety of settings – but spending less time in each spot. We expect to be able to work anywhere and everywhere, and we need furniture that can do the same.

While technology has changed much about the nature of work, it hasn't changed how we all like to work: in comfort. The Setu family includes multipurpose chairs, stools, lounge chairs, and ottomans, designed to deliver instant comfort from the moment you sit down.

Performance

Material innovation gives Setu Chairs their unique combination of flex and strength. The Kinematic Spine™ uses two types of polypropylene to control resistance as you recline and to support your weight, without a tilt mechanism. It bends and flexes with every movement, responding to the natural ways your body moves.

More structural element than textile, the finely tuned Lyris 2™ elastomeric material creates Setu’s one-piece seat and back. Lyris 2 works with Setu’s Kinematic Spine to distribute your weight evenly and conform to your contours. The open weave also aerates your body to keep you comfortable. On upholstered Setu Chairs, the C-Layer suspension works with a variety of textiles, adding a degree of structural support to the fabric.

The pliable Lyris 2 seat and back suspension adapts to your sitting bones, providing contouring comfort as well as aeration.

The versatility of the Kinematic Spine extends the Setu concept to support a variety of postures. With the Setu Lounge Chair, you can choose your ideal reclining position without making a single adjustment.

The Setu Multipurpose Chair has a height adjustment, and that’s it. There’s nothing to tweak, nothing to think about.

A unique combination of flex and strength.

Design

Setu is Studio 7.5’s solution for today’s more collaborative, less formal workspaces. From the graceful curve of its ribbon arms to the durable, uncoated Silver Alloy base, every part of the Setu Chair was painstakingly shaped and reshaped to ensure that each molecule falls into the right place to deliver the desired functionality. The result is an environmentally sensitive design that uses less material – only 7.7 kg for the multipurpose chair – to support people of all sizes, up to 136 kg (300 pounds). A range of upholstery and material options means you can outfit Setu to serve as a focal point or to blend into any space where you work or live.

About Studio 7.5

When Burkhard Schmitz and Carola Zwick started their design studio as a team of six in 1992, they were looking for the freedom to work on projects that interested them. And for the freedom from bosses and titles. “Everybody does everything,” says Schmitz, speaking for the group that now includes Carola’s brother, Roland Zwick. “That’s how we cultivate ideas and maintain our openness and curiosity.”

They find designing office chairs to be most rewarding and have worked with Herman Miller on the Setu Chair, the award-winning Mirra chair, Mirra 2, and Cosm. “We define not only how the chair looks but how it performs,” Carola says. As to how Setu, Mirra, and Cosm all perform for you, they provide comfort no matter how or where you sit.

Claudia Plikat, Burkhard Schmitz, Carola Zwick, and Roland Zwick

Setu Chairs

Family
Multipurpose Chair
Stool
Lounge Chair
Ottoman

The following information applies only to
Setu Multipurpose Chairs.

Overview	
Maximum User Weight	136 kg
Seat Height	
High-Height Range	432 mm–546 mm
Fixed-Height Range	470 mm
Setu Stool Height Range	670 mm–870 mm

Seat Depth	
Fixed Seat	381 mm

Arm Options
No Arms
Fixed Arms

Base Options
5-Star Base with Casters (Standard- or High-Height)
4-Star Base with Glides (Fixed-Height only)
